EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please cancel claims 12-20, drawn to a method for extrusion of hollow bodies, which are non-elected without traverse by Applicant's representative Darrel Wong, during the phone interview on 5/17/2007.

Please amend the specification on page 1 lines 8-11 as follows:

This application is a continuation of U S Application No. 10/364,308, filed on February 10,2003, which is now Abandonment, which claims priority under 35 U S C 119 to German Application No. DE 102 05 843.1, filed February 13, 2002, the entire teaching of which are incorporated herein by reference.

Allowable Subject Matter

- 1. Claims 1-11 and 21 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

Application/Control

Number: 10/679,200

Art Unit: 1791

- 3. The prior art of record fails to teach or suggest an extrusion of hollow bodies as defined in the claims of the instant application. The closet prior arts, Becker (U S Patent No. 4,063,865) teaches all claimed structural limitation of claim 1. It further teaches that webs of web pairs being arranged so they staggered, but not to be overlap in radial direction (See col.1 lines 29-33). Therefore, the prior arts either Becker (U S Patent No. 4,063,865) or Sokolow (U S Patent No. 3,899,276) fails to teach or suggest the webs of the web pair being arranged so they at least partially overlap as viewed in a radial direction as cited in claim 1.
- 4. Furthermore, Applicant's arguments received on 10/18/2007 regarding claims 11 and 21, which are considered and found persuasive because the prior art Sokolow (U S Patent No. 3,899,276) discloses in figure 3 radial channel (47) extending through fingers (101) between channels, however, the prior arts either Becker (U S Patent No. 4,063,865) or Sokolow (U S Patent No. 3,899,276) fails to teach or suggest means for providing a linear borehole from the exterior web to the interior web, the exterior and interior web being offset relative to each other about a common axis as recited in claims 11 and 21.

Application/Control

Number: 10/679,200

Art Unit: 1791

5. Furthermore, Becker discloses an extruder head having inner and outer rings connected together by the radial web, but fails to teach or suggest the orientation of the web.

- 6. Nor does there appear to be any reason in this reference, or combined with any of the other prior art of record, to modify the devices to result in such a combination of features.
- 7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dimple N. Bodawala whose telephone number is (571) 272-6455. The examiner can normally be reached on Monday - Friday at 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Yogendra N. Gupta can be reached on (571) 272-1316. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
